

ONLY RAIL!

PETITION REGARDING TRANSPORTATION OF COAL FROM RAVEN COAL MINE

We, the Undersigned, believe coal from the proposed Raven Coal Mine must be transported by no other means than railroad to its point of export.

We, the Undersigned, encourage consultations to be held between the Compliance Coal Corporation (the Proponent), the Island Corridor Foundation, Southern Rail of Vancouver Island, the Government of BC and other affected parties to rehabilitate and exclusively use the Island railway to transport coal from the mine production facility to its point of export.

We, the Undersigned, require the Proponent submit a modified Project Description to the BC EAO specifying rail as the sole transportation method for the project.

We, the Undersigned, call on the BC and Federal Environmental Assessment Offices to consider this project unacceptable if exported product is moved by truck due to increased highway congestion, public safety concerns, CO2 and smog emissions, and cost to taxpayers for maintenance of provincial and municipal roadways and to consider the extended environmental, social and economic benefits a revitalized Island Railroad would bring to residents and businesses on Vancouver Island.

INFO AND PETITIONS AT: WWW.NORAILNOCOAL.CA

Once completed, all original signed petitions will be submitted to the British Columbia Environmental Assessment Office during the official Public Comment Period.

A COPY OF ALL SIGNED PETITIONS WILL BE SENT TO:
