

Why Not Use No Coal?

There are many many reasons to oppose this coal mine outright and this website and petition is not meant to counter that opposition but to complement it. There are also many reasons to consider it a viable business opportunity and this petition is not meant to counter that either.

This petition *only* deals with the question of transportation as it is presented in the proposal.

Unfortunately, the Provincial Government only gives us one shot to have our say in the approval process. So not only must people voice their opposition or support to the project as a whole if they see fit, but they must also consider and fight for the best possible options to be followed if it does go through. The latter is what this petition addresses.

Otherwise, we relinquish our **only opportunity** to make a difference.

If you would like to join the effort to stop this Coal Mine please go to www.coalwatch.ca. There is information available there and there will be other petitions there in time as well.
